## How to add sensitivity assistant to Add-ins:

Download the file 'sensitivity.xla' from Moodle.

In your excel spreadsheet, click on "File" and select "Options" from the left hand pane.
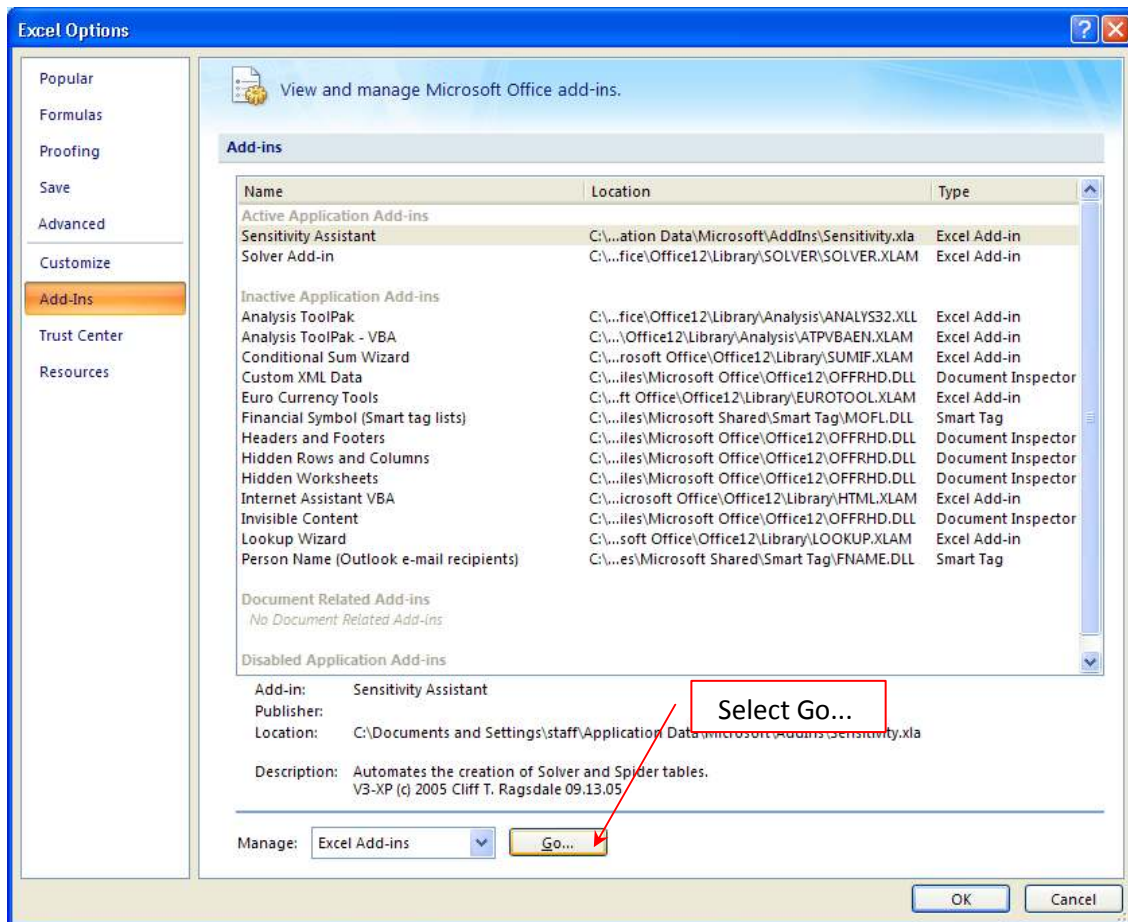

This will open up the following screen:

1. Select Macro settings

2. Then check this option
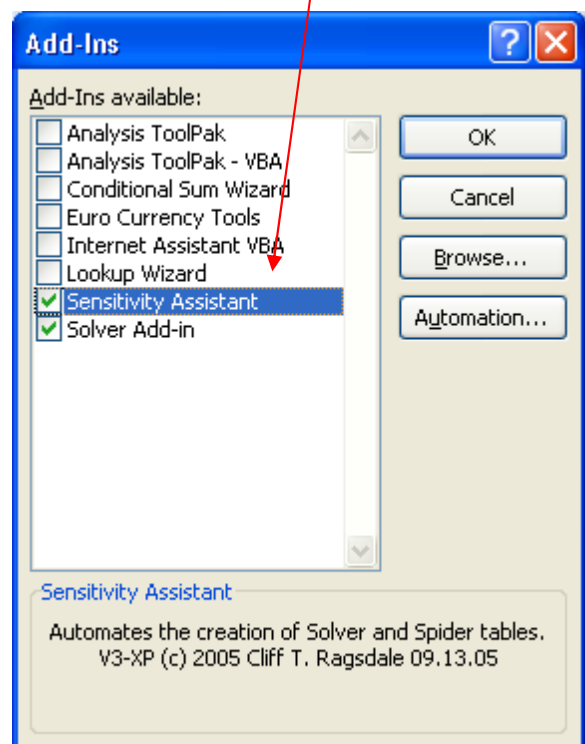

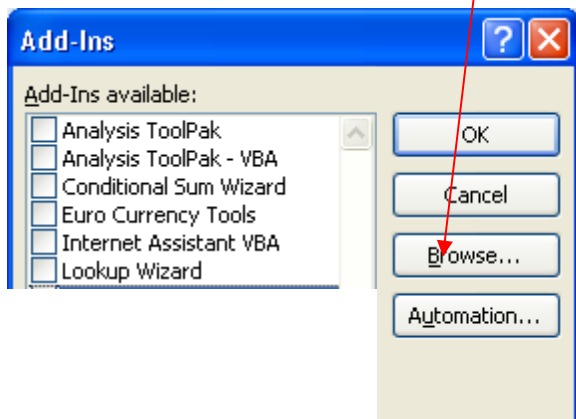

3. Select OK

You'll come back to this screen. Select "Add-ins".

This will open up the following, click on Browse. Look for the file 'sensitivity.xla' that you have downloaded. Answer "OK" to the prompt and sensitivity assistant will appear in your add-ins.

Save and close your excel file. Open it again and enable macro.

You need to run your solver first before running the sensitivity assistant. To get your "Spider" table and plot, select the "Add-ins" tab → Sensitivity Assistant
